DETAILED ACTION

1. Receipt of the papers filed on January 3, 2006, is acknowledged. Claims 10 and 11 have been canceled. Claims 1-9 are pending.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. The amendments are deemed to have overcome the rejection under 35 U.S.C. 112, second paragraph.

Claim Rejections - 35 USC § 103

4. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reid et al (US 2001/0015311) in view of the Lowenheim text *Electroplating* and Barstad et al (US 2001/0047942) for the reasons given in the previous office action and in view of the following comments.
5. Applicant's Remarks have been carefully considered but are not deemed to be persuasive. Applicant argues that the reference of record fail to teach that the chloride concentration is related to providing gap fill of substrate features having an aspect ratio of 8 or more. This argument is not convincing. Reid et al is directed to filling features with a range of aspect ratios without defects. See the abstract. This broad teaching of aspect ratios suggests an aspect ratio of 8 or more as now claimed. Lowenheim teaches that for proper action of the organic additives in a copper plating, a small amount of chloride is necessary. In table 12-7 Lowenheim lists a range of chloride from 0.02-0.08 g/l. The teaching of Lowenheim suggests that it within the skill of

one of ordinary skill to determine the amount of chloride to produce successful plating, i.e. plating without defects as produced by Reid et al. Based on the knowledge that chloride concentration is a result-effective variable, one of ordinary skill in the art would have been able to either add more or less chloride until the desired results were obtained.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
